## CSMS February Club Meeting 9:00 am Saturday, March 4, 2023

### President Report

To all C.S.M.S. club members: Next club meeting will be March 4 2023. If you can please attend this meeting it just a few days before our air show. Hope this will be one of our best air show to have this year and hope that the bad weather will stay away. So far I think we have got most of our work out of the way but there still may be some little things that need doing. Mark Skelly has picked up 3 bikes to be raffled. I think we got three (3) model Jets that we will raffle off and we have other things out on the table for a silent auction to be raffle off as well. So make sure you get your tickets for them. Looking for a great day and a good time at the airshow . Hope to see everyone out there. Stay safe and everyone have fun.

President - David Grantham

### Vice-President Report:

Happy Flying,

Vice President - Lee Ramsdell

### Safety Officer Report

Gentlemen another month has flown by with no major mishaps. Kudos for that. However some of you are continuing to fly inside the runway and over the flight stands. This is against the club rules as well as not safe. No one wants to get hit by one of these planes. I am getting complaints from other members so I have no choice but to enforce the rule. From now on you will get a warning and the second time I have to confront you the rule says you are done flying for the day. Please don't make me have to do this to anyone, we are out there to have fun and do it safely. If you are having trouble controlling your plane there are people on the field that would be happy to help you, just ask. Limit touch and go landings to when you are the only one flying. We are very busy out there right now and it is only fair to limit your landings to one. If you are the last one to leave please make sure the building is locked, coffee pot unplugged, and all lights turned off. and the gates locked and the combinations scrambled. Please don't forget about the upcoming event March 9-12, If you weren't there last year you will see some fantastic flying and some really nice planes. These people want you to fly with them when they are not doing their part of the show. If you need parts or a plane we have some great people there who will be more than able to help you with your needs. There will be some raffles and food so come out and have a good time.

Chief Safety Officer - Dave Leifheit

David Grantham – President

Lee Ramsdell – Vice President

Mark Skelly – Secretary
