President Report:

CSMS May Club Meeting

9:00 am Saturday May , 2021

To all club members: Hello club members. Another month has gone by and most of our northern friends are headed back home. We all hope that they have a safe trip back home and wait for them to return. The next club meeting will be May 1, 2021 at 9 o'clock at the airfield. Please come and help support the club. Please, everyone check their AMA card and make sure you are up-to-date. I know that there's not much going on right now due to the summer coming. Yes, it's going to get hot at times so just come out early in the morning before it gets too hot and have some fun time flying around with us who are out there.

President - David Grantham

Vice-President Report:

We got a few good flying days in April. Hope you took advantage of some of them. Here's hoping May will be even better.

I suppose we can't talk about the gate locks too much. In the past couple of months we have found the gates unlocked and at least one time NOT even closed when the first club member arrives in the morning. Remember the last club member to leave the field must escort any quest out, lock the building and lock both gate locks. There can be no exceptions.

V.P - Eddie D. Mattingly

Safety Office Report:

Another month down the tubes, but no casualties so that's great. Kudos to all our members. We have been very busy at the field in spite of uncooperative winds. We will be losing most of our transient members shortly, so stay safe on your trips home and hurry back. Some have already left and we hope all got where they were going safely. The rainy season is coming up so please use good judgment when parking at the field if it is very wet. Another reminder, there is no flying over the field unless landing and limit touch and goes if there are multiple flyers flying. If you are the last to leave the field please make sure all doors are locked, plugs unplugged, frequency box closed, lock combinations scrambled. Thanks to all of you for being so safety minded. By all means keep up this great work.

Safety officer - Dave Leifheit
