CSMS April Club Meeting

9:00 am Saturday November 5, 2022

President Report

Well, I guess this Florida summer is one for the record books. Not only did we have way too much rain, we also had one of the worst hurricanes. Carol and I feel we were very lucky with minimal damage especially considering the winds we experienced. I know some of our members suffered much more. I hope everyone is recovering and getting their lives back to normal.

Our club airfield was hit pretty hard. We lost the club house and runway. The runway has been temporarily repaired until materials can be purchased for a permanent repair. The club house has been disassembled and plans are for a new and bigger club house. Although our white fence was hit hard, miraculously all the parts have been found to reassemble the fence. We lost most of our tables and chairs.

The November Club meeting is November 5 at 9:00AM. Bring your own chairs and refreshments. If you plan on flying, charge your batteries at home

President - Eddie Dean Mattingly

Vice President Report:

There is no VP report this month. Lee and Linda plan on beening back for the club meeting.

Vice President - Lee Ramsdell

Safety Officer Report: (this didn't get published for October)

Hello gentlemen and ladies. Sounds like you have had a lot more rain than flying time this month. Which is why I elected to spend a few more weeks flying with my grandson. Should be back the first of October and hope your weather clears up before then. Thank you for being safe as always. You guys and gals are awesome. Please remember as the club gets busier to not fly south of the runway. Please call all take offs and landings and taxi. When there are numerous people flying please don't do touch and goes. Sounds like the parking areas are very wet so please be considerate and park where you are not making a mess of the area. Let's all hope the rains quit and it cools off some. See you soon.

Chief Safety Officer - Dave Leifheit

Hurricane Ian, 2022
